

"God saw the light was good, and God separated the light from the darkness." – Genesis 1:4

Genesis One Focus

Management Style: Strategic-Active
Composition: Equity (Individual Stocks)
Minimum Investment: \$35,000

DEVOUT PURPOSE:

The **Genesis One Focus** is a core model comprising hand-selected companies that have shown exceptional long-term earnings growth. These companies also meet rigorous Biblically Responsible Investing (BRI) "Value Filters." The companies in this portfolio have shown the ability to generate solid earnings even through recessionary periods in the past.

INVESTMENT APPROACH:

The **Genesis One Focus** combines approximately 80% of its sister model, the Genesis One, along with the additional 20% allocation consisting of stocks that the managers believe will provide even higher growth potential. This model is a strategic, long-term strategy that is actively managed using fundamental and technical analysis. It is not designed to track an index or to provide tactical downside protection. This strategy is designed to provide a stable, core portfolio of growth-oriented companies, and help clients meet their financial goals over a relatively long period of time. While there is no intention of tracking the S&P 500 index, the goal is to meet or exceed market performance over a full market cycle.

VALUE FILTERS:

Our commitment, first to our Lord, is that we will not invest a single penny into any company that violates our filters.

Investment advisory services offered through Optivise Advisory Services, LLC an SEC registered investment advisor. Please note that registration with the SEC does not denote a specific level of skill or guarantee the success of a particular investment strategy. Models with the Genesis series have an inception date of 1 November 2020. Any references to prior returns are only attributal to the source portfolio that the Genesis One models are derived from. While Optivise believes that the Genesis series models will maintain the same or better return and risk characteristics of the source portfolio there is limited actual return data. Past performance should not be used as the sole selection criteria for investing.
